

TECNALIA offers its technologies and services for pharmaceutical development and manufacturing at the largest international pharmaceutical event in Frankfurt

The research and technological development center will do so at CPhI Worldwide 2025, which will take place from October 28 to 30 at Messe Frankfurt

Bilbao, October 22, 2025. The TECNALIA research and technological development center will participate in CPhI Worldwide 2025, the leading international event for the pharmaceutical industry, which will take place from October 28 to 30 at Messe Frankfurt (Germany), where it will showcase its latest technologies and services related to the sector. Through its Pharmaceutical Development laboratories and its LABSAN manufacturing plant, TECNALIA has a wide range of specialized developments, covering virtually all pharmaceutical formats (solid, liquid, semi-solid, etc.), including advanced technologies such as 3D printing of personalized medicines. Added to this are capabilities in the development and validation of analytical methods, quality control, stability studies, and product release, covering all critical stages of the pharmaceutical life cycle.

Furthermore, LABSAN's a company belonging to the TECNALIA Group (manufacturing plant has state-of-the-art infrastructure for the production of clinical, pilot/regulatory, and commercial batches. All of this allows laboratories to maintain the traceability, scalability, and regulatory compliance required by international health authorities, working under European Good Manufacturing Practices (GMPs).

Its participation in the fair reinforces its role as a driving force in the sector, facilitating the development of medicines that improve people's quality of life. In this sense, TECNALIA presents itself as a key technological partner for pharmaceutical laboratories.

TECNALIA bases its relationship with companies on strategic collaboration, operational flexibility, and a commitment to innovation, providing added value to organizations through solutions tailored to each therapeutic need.

About TECNALIA

TECNALIA is Spain's largest applied research and technological development center, a benchmark in Europe, and a member of the Basque Research and Technology Alliance. It collaborates with companies and institutions to improve their competitiveness, people's quality of life, and achieve sustainable growth, thanks to a team of more than 1,500 people committed to building a better world through technological research and innovation. That is why TECNALIA's research has a real impact on society and generates benefits in terms of quality of life and progress. Its main areas of activity are: smart manufacturing, digital transformation, energy transition, sustainable mobility, health and food, urban ecosystem, and circular economy.

In the latest awareness and positioning study conducted by European Research Survey ERS in 2022, TECNALIA ranks first in R&D&I brand awareness.
